

Sartomer Asia to Present Technical Seminar on New Polyester Acrylates for Coatings and Inks at CHINACOAT 2018

UV/EB curing specialist Julie Zhou from Sartomer, a business unit of Arkema, will deliver a technical seminar on the properties of newly developed polyester acrylates at CHINACOAT 2018.

These new polyester acrylates are ideal for UV/EB inks and coatings applications because they promote high reactivity, excellent pigment wetting and advanced adhesion.

"Polyester acrylate oligomers offer enhanced performance in UV/EB curing applications when compared to epoxy acrylate oligomers and are cost-effective alternatives to urethane acrylates," said Julie Zhou. "Polyester acrylates allow for a low yellowing, high-quality UV/EB resin, and they have the added benefit of being easier to handle."

The seminar, conducted in Chinese, is scheduled for Tuesday, December 4, 2018 from 10:30 a.m.–11:20 a.m., Meeting Room 1, Area A, Hall 4.2 at the China Import & Export Fair Complex (Canton Fair Complex) in Guangzhou, China.

Julie Zhou joined Sartomer Asia in 2013 and manages UV-cure technology for applications including electronics, inks, adhesives and various coatings.

Also at CHINACOAT, Sartomer experts will feature latest advancements in UV/EB curing solutions for adhesives, specialty coatings, graphic arts and 3D printing at Arkema booth E37-42, Zone 7, Hall 2.1.

CHINACOAT 2018 takes place December 4-6, 2018 in Guangzhou, China at Area A, China Import and Export Fair Complex. For more information, visit <http://www.chinacoat.net>.

Sartomer is a premier global supplier of specialty chemicals for ultraviolet and electron beam (UV/EB), peroxide, and two-part epoxy/amine systems. For more than 60 years, Sartomer has pioneered the development of these advanced technologies, introducing hundreds of products that enhance performance in 3D printing, coatings, graphic arts, adhesives, advanced materials and other demanding applications. About Arkema

A designer of materials and innovative solutions, Arkema shapes materials and creates new uses that accelerate customer performance. Our balanced business portfolio spans high-performance materials, industrial specialties and coating solutions. Our globally recognized brands are ranked among the leaders in the markets we serve. Reporting annual sales of €8.3 billion in 2017, we employ approximately 20,000 people worldwide and operate in close to 55 countries. We are committed to active engagement with all our stakeholders. Our research centers in North America, France and Asia concentrate on advances in bio-based products, new energies, water management, electronic solutions, lightweight materials and design, home efficiency and insulation. www.arkema.com
