## Clear Lake Facility Acrylic Monomers HSE2Q Commitment

**The Clear Lake Facility in accordance with Arkema Inc.**, manufacturer of Acrylic Monomers in Pasadena, Texas, is committed to being the preferred supplier of its products. Achieving this status requires a commitment to our **C**ustomers, **E**mployees, **C**ommunities and **O**wners. Becoming the preferred supplier requires producing quality products while operating in a safe, reliable, environmentally sound and efficient manner. To aid in achieving and maintaining these goals, the facility implemented the Arkema Integrated Management System (AIMS) which includes; the Arkema Essentials, ISO 9001-2015, ISO 14001-2015, ISO 50001-2011 and OHSAS 18001-2007. These management systems focus on improving employee health & safety on and off the job, employee training, protecting the environment by being consistent with the life cycle process, Interested Parties, reducing risk, fire prevention, plant security, improving customer satisfaction, reducing energy consumption and protection of intellectual property while complying with all legal and regulatory requirements. Key performance indicators used to monitor management system performance include but are not limited to; incident and injury rates, open/past due corrective & preventive actions, raw material efficiency, energy intensity, customer complaints and first pass prime. The facility routinely updates and reviews these indicators in order to monitor control and effectiveness.

**C**ustomer satisfaction is our commitment and is driven by understanding and communicating their requirements throughout our organization. Product stewardship standards are maintained and communicated to our customers to ensure our products are transported, used, and disposed of in a safe and environmentally sound manner.

**E**mployee participation in the development of our management systems is expected and is a critical component in achieving continuous improvement. All employees and contractors are held accountable for meeting and following the established management system standards and procedures. Plant Management is responsible and held accountable for establishing, implementing, and improving the management systems, standards, and procedures. Plant Management is equally responsible for ensuring employees are given the resources and training to safely accomplish their objectives and to grow professionally in a diverse environment.

**C**ommunity trust is established through the development and implementation of sound health, safety, and environmental management systems. Our systems are designed to ensure compliance with both the spirit and letter of all applicable federal, state, and local rules and regulations. This includes maintaining emergency response capabilities on site. We openly communicate with community members through participation in the BAYCAP, emergency planning organizations and membership in the Local Chamber of Commerce. The facility follows the principles defined in the American Chemical Council's Responsible Care Codes.

**O**wners' expectations are satisfied as we grow and increase profitability - through the use and continued improvement of our management systems.
