

Torrance, Calif.

19206 Hawthorne Blvd. Torrance, CA 90503
Plant Manager: Olivier DePauw – 310-214-5327

The Torrance, Calif. plant produces a range of latex emulsion products that are supplied to manufacturers of coatings, adhesives and construction products.

Community involvement

- **Certified Unified Program Agencies (CUPA)** – our site participates in local emergency planning meetings and complies with all notification and reporting obligations.
- **City of Torrance Emergency Response System** – The Torrance plant, along with other chemical companies, pay permit fees to ensure local emergency responders have the equipment needs to respond to emergencies.
- **Torrance Chamber of Commerce Member**
- Supported fundraising efforts for **The Children's Clinic of Long Beach**
- Supported local **Toys for Tots** Program
- The plant supports the local community through donations and participation in community programs such as Arkema's Science Teacher Program, and fundraisers for various causes like **St. Jude's Children's hospital**.
- **Emergency Response Drill** with participation from local authorities and emergency responders.

Investment in health, environment and safety

- Process safety, capacity and engineering.
- Mechanical integrity projects and programs designed to improve the infrastructure.
- Personnel training and development.
- Tanker loading improvements.
- Any liquid (including rain water) that is generated at our facility is collected, tested and sent to the LA Sanitation County Industrial Wastewater facility for treatment.
- Tank vents from all reactor trains and monomer storage tanks are sent to a permitted incinerator/vent treatment system to minimize/eliminate vapor emissions. Mechanical piping joints are periodically fugitive emissions tested for integrity and AQMD compliance rules.
- To reduce waste generation, off-grade latex is sold to other companies for use in industrial applications.
- Arkema Coating Resins is continuously:
 - Improving its products, manufacturing practices and services to minimize impact to the environment
 - Assists customers in scientific analyses to better understand the potential environmental impact of our products and formulations made with our products
 - Provides information on the safe transport, storage and use of our products
 - Meets or exceeds all required regulatory standards in our operations and products
 - Providing regulatory compliance information to our customers
 - Serves as an open and cooperative partner to the communities in which we operate

About Arkema

Building on its unique set of expertise in materials science, Arkema offers a portfolio of first-class technologies to address ever-growing demand for new and sustainable materials. With the ambition to become in 2024 a pure player in Specialty Materials, the Group is structured into three complementary, resilient and highly innovative segments dedicated to Specialty Materials - Adhesive Solutions, Advanced Materials, and Coating Solutions - accounting for some 80% of Group sales, and a well-positioned and competitive Intermediates segment. Arkema offers cutting-edge technological solutions to meet the challenges of, among other things, new energies, access to water, recycling, urbanization and mobility, and fosters a permanent dialogue with all its stakeholders. The Group reported sales of €8.7 billion (\$9.7 billion) in 2019, and operates in some 55 countries with 20,500 employees worldwide. www.arkema.com
